ELSEVIER

Powder Technology 107 (2000) 294–297

POWDER TECHNOLOGY

www.elsevier.com/locate/powtec

Subject Index of Volume 107

Adsorption
Investigation of the influence of the polyvinyl alcohol adsorption on the electrical properties of Al_2O_3–solution interface, thickness of the adsorption layers of PVA, 251
Aerosols
Development and operation of an improved turntable dust feeder, 36
Angle of internal friction
Effect of particle shape on angle of internal friction by triaxial compression test, 131
Attrition
Attrition of sorbents during fluidized bed calcination and sulphation, 153
The fracture of glass spheres, 179

Bed expansion
Expansion of gas–solid fluidized beds at pressure and high temperature, 212
Binary organic solvents
Further application of a modified spontaneous emulsification solvent diffusion method to various types of PLGA and PLA polymers for preparation of nanoparticles, 137
Binder viscosity
Drum granulation of NPK fertilizers, 282
Breakage
The breakage induced by a single grinding ball dropped onto a randomly packed particle bed, 108
Brittle/ductile transition
Comminution of a brittle/ductile material in a Micros Ring Mill, 175

Calcination
Attrition of sorbents during fluidized bed calcination and sulphation, 153
Calculation
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197
Circulating fluidized bed
Measuring and calculating solid carry over in a CFB cold flow model for different materials, 207
Coal log
Optimal moisture for rapid compaction of coal logs for freight pipelines, 273
Collection efficiency
A study of the effect of high inlet solids loading on a cyclone separator pressure drop and collection efficiency, 60
Comminution
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Comminution of a brittle/ductile material in a Micros Ring Mill, 175
The fracture of glass spheres, 179
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197

Compacted powder
The influence of punch curvature on the mechanical properties of compacted powders, 79
Compression
The fracture of glass spheres, 179
Concentration
Particle velocity and concentration characteristics in a horizontal dilute swirling flow pneumatic conveying, 144
Coordination number
Dynamic simulation of random packing of spherical particles, 123
Copolymer ratio
Further application of a modified spontaneous emulsification solvent diffusion method to various types of PLGA and PLA polymers for preparation of nanoparticles, 137
Cyclones
A study of the effect of high inlet solids loading on a cyclone separator pressure drop and collection efficiency, 60

Decomposition
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
DEM simulation
Vibrating powder beds: a comparison of experimental and Distinct Element Method simulated data, 13
Determination of sample size
Number of particles for the determination of size distribution from microscopic images, 243
Diffusion approximation
Light backscattering by fine non-absorbing suspended particles, 1
Disintegrators
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Dispersion
Development and operation of an improved turntable dust feeder, 36
Dispersions
Evaluation of the drying process in spouted bed and spout fluidized bed of xanthan gum: focus on product quality, 234
Distinct element method
Dynamic simulation of random packing of spherical particles, 123
Drum granulation
Drum granulation of NPK fertilizers, 282
DTA
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Dust feeder
Development and operation of an improved turntable dust feeder, 36
Dust generation
Development and operation of an improved turntable dust feeder, 36

Elbow
Effect of a combination of two elbows on particle roping in pneumatic conveying, 226

Elsevier Science S.A.
PII: S0032-5910(99)00297-1

Energy
Vibrating powder beds: a comparison of experimental and Distinct Element Method simulated data, 13
Ettringite
Sonochemical synthesis of ettringite from a powder mixture suspended in water, 43

Filtering hydrocyclones
Analysis of the influence of the filtering medium on the behaviour of the filtering hydrocyclone, 259
Fine particles
Light backscattering by fine non-absorbing suspended particles, 1
Fine powder
Effect of particle shape on angle of internal friction by triaxial compression test, 131
Fluidization
Fluidization of $CaCO_3$ and Fe_2O_3 particle mixtures in a transverse rotating magnetic field, 66
Expansion of gas–solid fluidized beds at pressure and high temperature, 212
Fluidized bed
Attrition of sorbents during fluidized bed calcination and sulphation, 153
Fluidized beds
Expansion of gas–solid fluidized beds at pressure and high temperature, 212
Formation
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Fracture
The fracture of glass spheres, 179
Freight pipeline
Optimal moisture for rapid compaction of coal logs for freight pipelines, 273

Gamma Al_2O_3
Transition of γ-Al_2O_3 into α-Al_2O_3 during vibro milling, 48
Gas-mass
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Gas–solid separation
A study of the effect of high inlet solids loading on a cyclone separator pressure drop and collection efficiency, 60
Gas–solids fluidized bed
Particle size distribution in a continuous gas–solid fluidized bed, 54
Gas–solid two-phase flow
Particle velocity and concentration characteristics in a horizontal dilute swirling flow pneumatic conveying, 144
Glass
The fracture of glass spheres, 179
Grinding
Transition of γ-Al_2O_3 into α-Al_2O_3 during vibro milling, 48
Grinding ball
The breakage induced by a single grinding ball dropped onto a randomly packed particle bed, 108

High surface area
Synthesis of high surface area tin oxide powders via water-in-oil microemulsions, 268
Ho-nitrate
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Ho-oxide
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Hydrocyclones
Analysis of the influence of the filtering medium on the behaviour of the filtering hydrocyclone, 259
Hydrodynamic behavior
Hydrodynamic behavior of magnetically stabilized fluidized beds of magnetic particles, 31

Ibuprofen
Comminution of a brittle/ductile material in a Micros Ring Mill, 175
Image analysis
Number of particles for the determination of size distribution from microscopic images, 243
Impact
The fracture of glass spheres, 179
Interparticle magnetic force
Hydrodynamic behavior of magnetically stabilized fluidized beds of magnetic particles, 31

Kinetics
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197
Kolmogorov–Smirnov statistics
Number of particles for the determination of size distribution from microscopic images, 243

Light backscattering
Light backscattering by fine non-absorbing suspended particles, 1
Limestone
Attrition of sorbents during fluidized bed calcination and sulphation, 153

Magnetic particle
Fluidization of $CaCO_3$ and Fe_2O_3 particle mixtures in a transverse rotating magnetic field, 66
Magnetic particles
Hydrodynamic behavior of magnetically stabilized fluidized beds of magnetic particles, 31
Mechanical activation
Transition of γ-Al_2O_3 into α-Al_2O_3 during vibro milling, 48
Mechanical properties
The influence of punch curvature on the mechanical properties of compacted powders, 79
Mechanism
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197
Mechanochemistry
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197
Melting
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197
Microscopy
Number of particles for the determination of size distribution from microscopic images, 243
Microstructure
Evaluation of the drying process in spouted bed and spout fluidized bed of xanthan gum: focus on product quality, 234
Mills
Mechanism and kinetics of mechanochemical processes in comminuting devices. 1. Theory, 93
Mechanism and kinetics of mechanochemical processes in comminuting devices 2. Applications of the theory. Experiment, 197

Modeling
Modeling of U-beam separator, 84
Molecular weight
Further application of a modified spontaneous emulsification solvent diffusion method to various types of PLGA and PLA polymers for preparation of nanoparticles, 137
Monte Carlo simulations
Light backscattering by fine non-absorbing suspended particles, 1

N_2 adsorption
Titania-induced changes of silica texture upon moderate heating, 118
Nanoparticle
Further application of a modified spontaneous emulsification solvent diffusion method to various types of PLGA and PLA polymers for preparation of nanoparticles, 137
NPK fertilizer
Drum granulation of NPK fertilizers, 282
Number of ideal mixing vessel connected in series
Residence time distribution studies in annular circulating fluidised bed drier, 256

Particle bed
The breakage induced by a single grinding ball dropped onto a randomly packed particle bed, 108
Particle characterization
Measuring and calculating solid carry over in a CFB cold flow model for different materials, 207
Particle flow pattern
Particle velocity and concentration characteristics in a horizontal dilute swirling flow pneumatic conveying, 144
Particle packing density
Dynamic simulation of random packing of spherical particles, 123
Particle random packing
Dynamic simulation of random packing of spherical particles, 123
Particle roping
Effect of a combination of two elbows on particle roping in pneumatic conveying, 226
Particles
Development and operation of an improved turntable dust feeder, 36
Particle shape
Effect of particle shape on angle of internal friction by triaxial compression test, 131
Particle size distribution
Particle size distribution in a continuous gas–solid fluidized bed, 54
Number of particles for the determination of size distribution from microscopic images, 243
Particle velocity
Particle velocity and concentration characteristics in a horizontal dilute swirling flow pneumatic conveying, 144
Phase transformation
Transition of γ-Al_2O_3 into α-Al_2O_3 during vibro milling, 48
PLGA
Further application of a modified spontaneous emulsification solvent diffusion method to various types of PLGA and PLA polymers for preparation of nanoparticles, 137
Pneumatic conveying
Particle velocity and concentration characteristics in a horizontal dilute swirling flow pneumatic conveying, 144
Effect of a combination of two elbows on particle roping in pneumatic conveying, 226
Polymer
Investigation of the influence of the polyvinyl alcohol adsorption on the electrical properties of Al_2O_3–solution interface, thickness of the adsorption layers of PVA, 251
Polyvinyl alcohol
Investigation of the influence of the polyvinyl alcohol adsorption on the electrical properties of Al_2O_3–solution interface, thickness of the adsorption layers of PVA, 251
Pore structure
Titania-induced changes of silica texture upon moderate heating, 118
Synthesis of high surface area tin oxide powders via water-in-oil microemulsions, 268
Powders
Vibrating powder beds: a comparison of experimental and Distinct Element Method simulated data, 13
Pressure
Expansion of gas–solid fluidized beds at pressure and high temperature, 212
Pressure drop
A study of the effect of high inlet solids loading on a cyclone separator pressure drop and collection efficiency, 60
Pseudo-dispersion number
Residence time distribution studies in annular circulating fluidised bed drier, 256
Punch curvature
The influence of punch curvature on the mechanical properties of compacted powders, 79

Rapid compaction
Optimal moisture for rapid compaction of coal logs for freight pipelines, 273
Residence time of ragi particle
Residence time distribution studies in annular circulating fluidised bed drier, 256
Rheology
Evaluation of the drying process in spouted bed and spout fluidized bed of xanthan gum: focus on product quality, 234
Rotating chain
Fluidization of $CaCO_3$ and Fe_2O_3 particle mixtures in a transverse rotating magnetic field, 66

SEM
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Separation
Analysis of the influence of the filtering medium on the behaviour of the filtering hydrocyclone, 259
Silica
Titania-induced changes of silica texture upon moderate heating, 118
Sintering
Titania-induced changes of silica texture upon moderate heating, 118
Size distribution
Light backscattering by fine non-absorbing suspended particles, 1
Drum granulation of NPK fertilizers, 282
Solid carryover
Measuring and calculating solid carry over in a CFB cold flow model for different materials, 207
Solids
Particle size distribution in a continuous gas–solid fluidized bed, 54
Sonochemistry
Sonochemical synthesis of ettringite from a powder mixture suspended in water, 43
Sulphation
Attrition of sorbents during fluidized bed calcination and sulphation, 153
Suspensions
Light backscattering by fine non-absorbing suspended particles, 1
Swirling flow pneumatic conveying
Particle velocity and concentration characteristics in a horizontal dilute swirling flow pneumatic conveying, 144

Temperature
Expansion of gas–solid fluidized beds at pressure and high temperature, 212

TG
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168
Tin oxide particles
Synthesis of high surface area tin oxide powders via water-in-oil microemulsions, 268
Titania
Titania-induced changes of silica texture upon moderate heating, 118
Tracer response
Residence time distribution studies in annular circulating fluidised bed drier, 256
Transverse rotating magnetic field
Fluidization of $CaCO_3$ and Fe_2O_3 particle mixtures in a transverse rotating magnetic field, 66
Triaxial compression test
Effect of particle shape on angle of internal friction by triaxial compression test, 131
Tri-calcium aluminium monosulphate
Sonochemical synthesis of ettringite from a powder mixture suspended in water, 43
Two-dimensional gas–particle flow
Modeling of U-beam separator, 84
Type-C particle
Fluidization of $CaCO_3$ and Fe_2O_3 particle mixtures in a transverse rotating magnetic field, 66

U-beam
Modeling of U-beam separator, 84
Ultrasound
Sonochemical synthesis of ettringite from a powder mixture suspended in water, 43

Vibration
Vibrating powder beds: a comparison of experimental and Distinct Element Method simulated data, 13

Water-in-oil microemulsions
Synthesis of high surface area tin oxide powders via water-in-oil microemulsions, 268

XRD
Physicochemical characterization of the decomposition course of hydrated holmium nitrate. Thermoanalytical studies, 168

Zeta potential
Investigation of the influence of the polyvinyl alcohol adsorption on the electrical properties of Al_2O_3–solution interface, thickness of the adsorption layers of PVA, 251
